

U.S. Flight Delay & Cancellation Analysis - January 2024

SQL-based analysis of ~547k flights using BTS data

On-Time Arrival Rate

76.5%

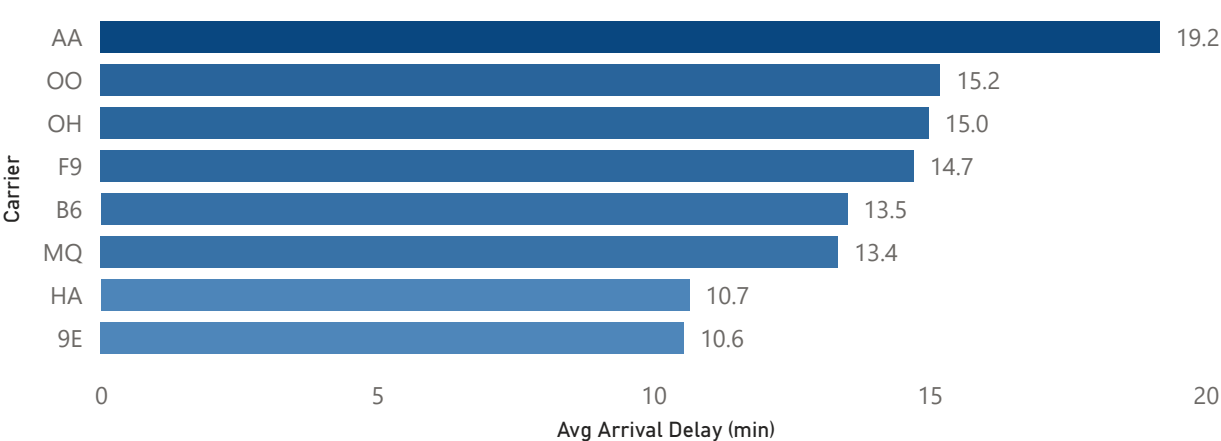

Cancellation Rate

3.7%

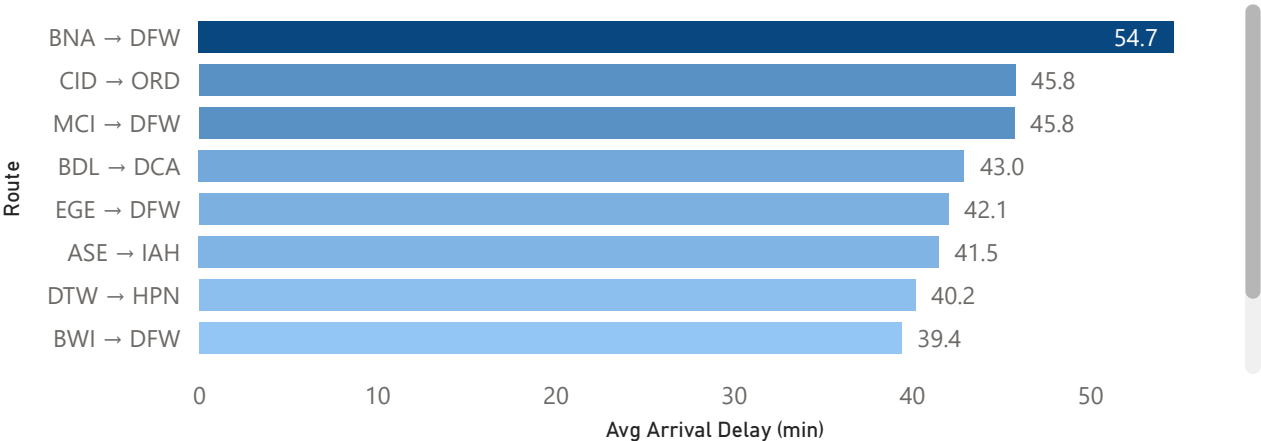

Avg Arrival Delay

10.4 min

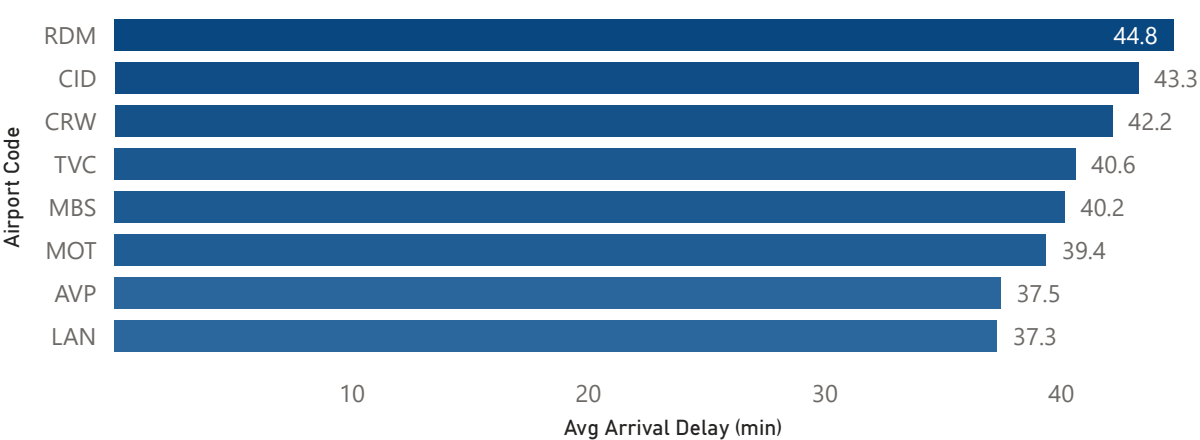

Average Arrival Delay by Carrier

Average Arrival Delay by Route (Top 10)

Average Arrival Delay by Airport (Top 10)

Key Insights

- Flight performance is generally strong, but averages are skewed by a small number of large delays
- Delays originate more at departure, with partial recovery in transit
- Disruption is concentrated in specific routes and airports, not system-wide
- DFW appears repeatedly as a major network bottleneck
- Smaller regional airports show higher delay and cancellation rates
